Each agent can use this module, will have its customers data and managing the appointments planned, different from other colleagues that they use the same application. Through a guided and controlled tool, each agent can periodically copy and transfer data into the central enterprise management system, through network connection or by e-mail.

The company will have the commercial data updated, for all agents; the activities that are carried out individually and planned, and more generally all the agent's data.

@/Arpro  
designed for  
platforms:

@/Arpro CA – **Module Commercial Area** is connected to the business management software @/Arpro, it can transfer contacts opened by agents directly into the central system, such as customer names through some selection filters.

We remain at your disposal for any need, on this occasion we send you our best regards.
