@/Arpro Erp “Module Production”

@/Arpro
designed for
platforms:

It represents our solution in the context of production for manufacturing businesses: there're many companies that show deficiencies in these areas certainly difficult to control and manage.

From the experience gained from advices made directly to manufacturing companies involved is born **@/Arpro Erp - Production** that meets the most common problems with simplicity and versatility.

The program allows purchases planning for the production on the basis of a customer orders backlog existing, optimizing the management of warehouse stocks and minimizing situations of over or under stock.

Differently these situations generate certainly issues to the company, resulting in loss of income or excess storage with consequent problems of arrangement of goods, deterioration, obsolescence or other.

Business Management Software

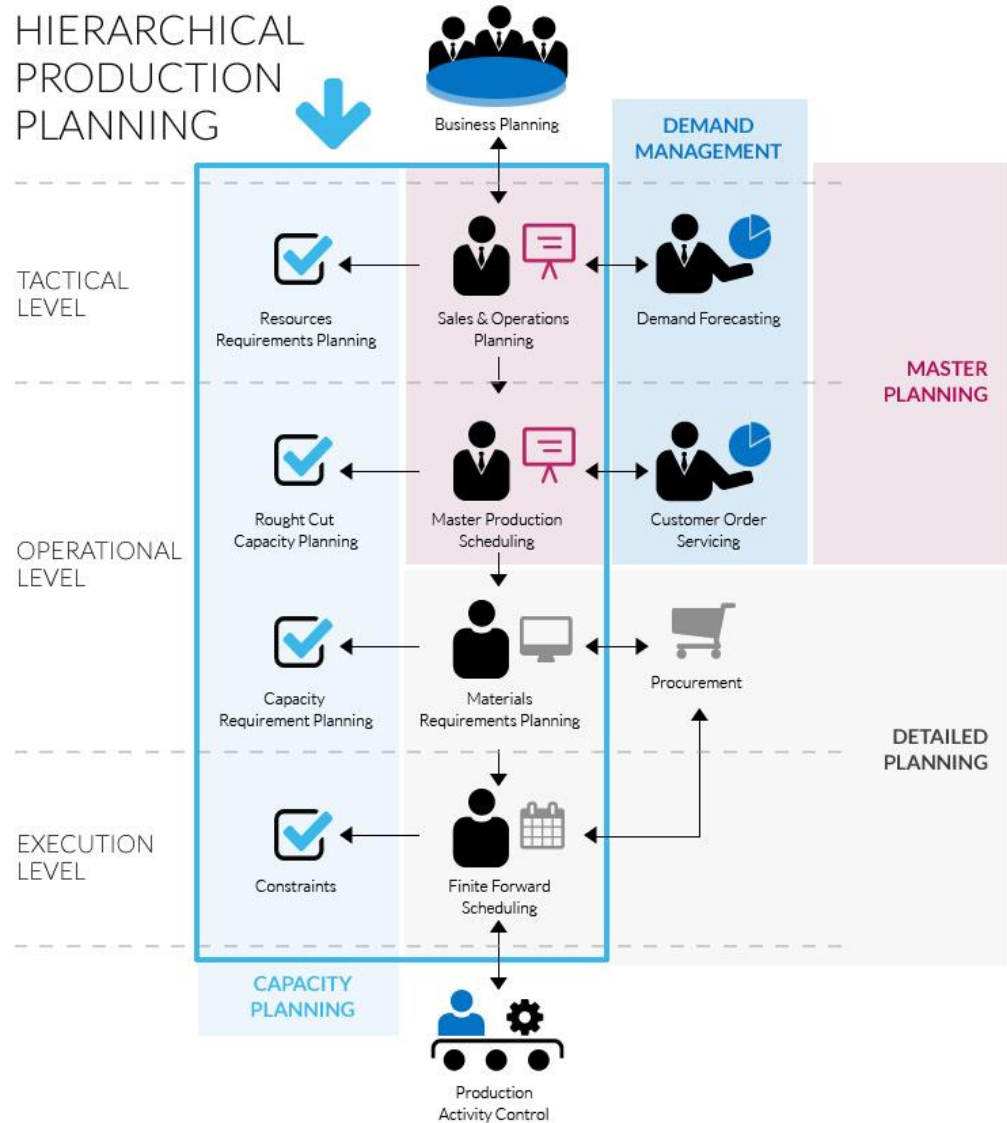

The results of the processing generate order proposals to supplier or proposals of internal or external workings.

These proposals after being examined and/or modified at will, can be confirmed by generating the respective orders. During these phases you can use some available reports that allow a view of the planning's results.

The planning can be generated even in the face of simulated customer orders to allows some evaluations that can answer the following questions:

- ✓ *the availability of articles is sufficient or it's necessary to provide orders to supplier or production (in the case of semi-finished or finished items)?*
- ✓ *What's the production times required to process a possible customer order, compared to that resulting the load contingent of business departments?*

At this point, through the reports available you can analyze the course of the advancement production up to the final phases, with the recognition of the costs on completion. These costs can then be compared with the values shown in the budget, allowing for an evaluation of the results or losses obtained.

The availability of some Gantt charts finally allows a less detailed but certainly more clear and immediate evaluation, using the program Microsoft Project®.

The various installations are confirming that it's a good solution, easy to use and customizable.

We remain at your disposal for any need, on this occasion we send you our best regards.
