

@/ARPRO

BUSINESS MANAGEMENT SOFTWARE

A SIMPLIFIED SOLUTION FOR BUSINESSES, COVERING THE MAIN AREAS OF THE ENTIRE MANAGEMENT SYSTEM

The complete business solution for your company; easy to use, reliable, fast and with an available programming department for customizations.

This software is distinguished by being a platform that already consists of the main components without any sub-division into different modules, even in the basic version and at a very competitive price.

In collaboration with our dealers and support centers we offer qualified technical assistance: telephone hotlines, remote connections, training activities and updates.

Compatible with Microsoft Windows[®], it takes advantage of the network operating systems and supports available devices (printers, telefax, VoIP phone, etc.).

In addition to the typical management functionality, @/Arpro allows integration with external documents made by different applications: Microsoft Office[®], Autodesk AutoCAD[®], Adobe Acrobat[®], etc., thus providing the basis for documents management (CRM). Integrates e-mail management where you can send documents such as invoices, orders and quotes directly from the program by using the addresses for the customers and suppliers entered in the programs.

For all Microsoft Windows[®]
operating systems

Designed for

With the contribution of:

N & R Venice (Italy)
N & R Udine (Italy)

@/ARPRO

BUSINESS MANAGEMENT SOFTWARE

FEATURES

Accounting:
