@/Arpro® “Cash Register (POS)”

Florida Region, USA

@/Arpro®
designed for
platforms:

[Italian area]

With the
contribution of:
Arpro – Venice
Arpro – Udine

@/Arpro® includes very simple and efficient management of cash registers that comply with the standards of the program.

This is a *greatly* simplified system for issuing receipts while simultaneously unloading warehouse inventory and managing the fidelity cards, with an integrated function that directly connects to accounting for daily closing and the automatic recording of warehouse movements (related to sales for the day).

The computer with @/Arpro® installed is your workstation directly connected with the cash register. The cash register records the fiscal data and prints the receipts just as a normal printer would (slave mode).

Through the various search conditions and the reports, all transaction details can be displayed: by operator, article, product group, etc.

Please ask our sales department which cash registers are currently supported and the easiest to use with a touch-screen monitor.

Following, are some images highlighting the management interface of the program, the simple payment procedures and the process of daily closing.

A simplified and completed SOLUTION for businesses:

@/Arpro®, ... Treasury, ... Analytical Accounting, ... Production, ... Job Orders, ...
