@/Arpro Erp® “Job Orders Module”

Florida Region, USA

@/Arpro Erp® Job Orders (or Production Orders) define:

@/Arpro®
designed for
platforms:

- 1) which Project is to be processed;
- 2) at which location;
- 3) at what time;
- 4) what quantity of materials & resources are required;
- 5) which sequence of operations are to be used;
- 6) & how the order costs are to be settled.

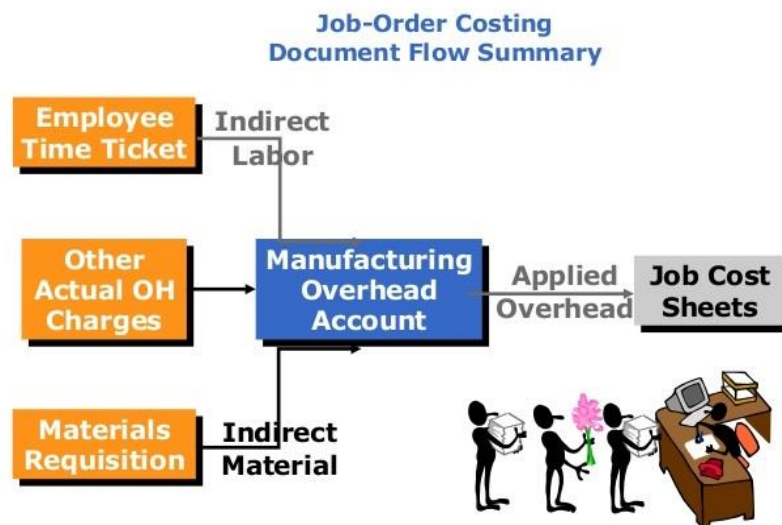

This solution is linked to the company warehouses, work centers & resources, accounting infrastructure, *in real-time*.

A complete entry-level solution for optimally managing the production area, with a low-price level investment!

Automation at its finest!

@/Arpro®
designed for
platforms:

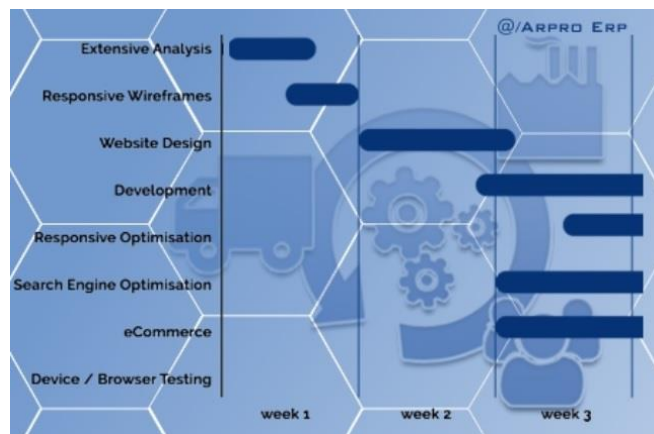

Upon receipt of the Customer Order and confirming the details of a Quote, easily generate the corresponding Job Orders.

Simply insert materials and all of the processes carried out (divided by work center, resources), to complete the project to obtain a detailed final balance for an evaluation of costs, margins & profits.

Once the projects are partially completed (Progress Billing) or finished, the Job Order auto-transforms into Sales Invoices while auto-generating payment deadlines & accounting records, in real-time.
