A planning solution is essential for companies where, in the face of customer orders, it is necessary to generate corresponding orders to the supplier or workmanship while meeting customer needs. Each generated order contains the references to the original customer orders in detail. So, we do just that and more....

"The mechanism to meet customer needs"

@/Arpro Erp[®] Planning analyzes customer order backlogs, the warehouse situation & minimum stock, orders to supplier and production situations, *in real-time*. In "Simulation mode" or in "Real mode", it auto-generates a list of requirements: warehouse items, semi-finished or finished (BOMs) & necessary tasks, keeping you on or ahead of schedule.

@/Arpro[®]
designed for
platforms:

Windows

**The Purchase Office is refreshingly automated!
Try it, you'll like it.**

IT WORKS!!!

A Thorough Planning Instrument, equipped with various
advantageous characteristics ... **@/Arpro Erp[®]**

- supplier orders auto-generated from customer deadline needs
- work orders auto-generated from ...
- simulated orders from picking list requirements
(alleged customer orders)

“Warehouse balance”

Ensuring a solid flow of revenue through good customer relations may be important, but the business needs to be on a firm footing to be in a position to serve the customer. Overstocking will reduce working capital, it can also lead to stock obsolescence, reducing profitability. The purchasing strategy therefore needs to balance business needs against customer needs.

@/Arpro®
designed for
platforms:

“Production & Calendar Plans”

All production planning is organized around production plans (MRP1-2): a common reference in all processes of manufacturing.

To obtain a reliable projection of the working time of various departments in real-time, recording ordinary and extraordinary “work”, simply set up the production calendar associated with the production plan.

Microsoft Project®, **Microsoft Excel®** and **@/Arpro Erp®** has an integral connection that extracts projections and production situations into customizable Gantt® charts and spreadsheets.

We remain at your disposal for any questions. With this opportunity we send you our best regards.
