Produce more while wasting less!

The technologies that characterize Industry 4.0 are:

- ✓ advanced robotics
- ✓ additive manufacturing (3D printing, digital manufacturing)
- ✓ horizontal & vertical integration from producer to consumer (the entire chain communicates)
- ✓ production simulation
- ✓ Cyber-Security (management of large amounts of data directly on the network)
- ✓ "real-time" data analysis

The benefits of this "now" technology are various: process flexibility & speed, higher productivity, quality & less waste, true product competitiveness.
